

AVIMIN™

B A S E M I X

Why use basemix?

Most farms have to deal with problems associated with feed production such as quality control and inventory management of micro-ingredients like amino acids, vitamins and minerals; homogeneity of mixing these micro-ingredients and coming up with a feed formulation that could improve farm efficiency. The use of basemixes helps solve these problems by simplifying feed compounding. Avimin™ basemixes are specially formulated to meet all the micronutrient needs of the animals at various stages of growth and reproduction.

Avimin™ Line of Basemixes

Avimin is coined from the three essential groups of nutrients: **A**mino acids, **V**itamins and **M**inerals. These nutrients though added in minute amounts in feeds are considered vital in the growth, reproduction and maintenance requirements of animals. The Avimin Line of basemixes guarantees to contain the proper amounts of micronutrients needed by poultry and swine at different stages of production. It also makes feed mixing easy because a farmer can already produce a complete feed by simply adding it to macro-ingredients like corn, soybean meal, oil and by-products.

HOW TO USE BASEMIX

$$\begin{array}{l} \text{Avimin basemix} + \text{Corn} + \text{Soybean meal} \\ + \text{By-products} + \text{Oil} = \text{COMPLETE FEED} \end{array}$$

AVIMIN™ BASEMIX PRODUCT LINES

Avimin Swine Basemixes 5 %

BASEMIX	STAGE	AGE
Avimin SGF 5%	Starter	61-90 days
	Grower	91-120 days
	Finisher	121 to market
Avimin Breeder 5%	Breeder	
Avimin Lactation 5%	Lactating	

Avimin Swine Basemixes 1.5 %

BASEMIX	STAGE	AGE
Avimin SGF 1.5%	Starter	61-90 days
	Grower	91-120 days
	Finisher	121 to market
Avimin BL/BLO* 1.5%	Breeder	
	Lactating	
*with Gromega Ultra		

Avimin Poultry Basemixes 5 %

BASEMIX	STAGE
Avimin Bro 5 %	Chick Booster, Broiler Starter Broiler finisher, Chick starter
Avimin Reppul 5 %	Chick grower, Pullet developer
Avimin Lay 5 %	Prelay, Layer
Avimin Breeder 5 %	Broiler Breeder

Avimin Poultry Basemixes 2.5 %

BASEMIX	STAGE
Avimin Reppul 2.5 %	Chick grower, Pullet developer
Avimin Lay 2.5 %	Prelay, Layer
Avimin Breeder 2.5 %	Broiler, Breeder

Avimin™ Basemix

Avimin Basemix is a blend of essential **Amino Acids**, **Vitamins**, and **Minerals** needed by poultry and hogs.

Avimin Basemix can be custom mixed and fortified with enzymes and other feed additives per the specifications of or request of any farm.

Avimin Basemix is added at levels of 1.0% to 5.0% to soybean oil meal, corn and other byproducts to make a complete and balanced poultry and hog rations.

Agrispecialist, Inc. is ISO 22000:2005 certified which ensures precision and traceability in all aspects of production. Food safety hazards from raw materials to finish products are meticulously screened to ensure that food is safe for human consumption.

Avimin Basemix is not just a product, but a total service and quality package for the Filipino farmers and feed millers.

Inclusion Rate:

Avimin Basemix is added at levels of 1% to 5% to soybean oil meal, corn and other byproducts to make a complete and balanced poultry and hog rations.

Storage:

Store in a cool place away from heat and direct sunlight. Keep partially consumed bags tightly closed when not in use.

Manufactured by:

American Road, Greenfield Auto Park, Sta. Rosa, Laguna, Philippines 4026
