

AVIMIN™

CUSTOM PREMIX

AVIMIN™ CUSTOM PREMIX

Avimin™ Custom Premix is a vitamin and mineral premix for swine, poultry and aqua. These vitamin and mineral premixes are exclusively prepared to achieve the desired level of nutrition in different stages, growth and performance of animals to avoid vitamin deficiencies and toxicities.

Avimin™ Custom Premix can be customized for specific breeds of broilers, layers and hogs. The vitamin and mineral content is prepared according to the nutritional requirements of poultry, swine and aqua or as specified by any customer, farm or feed mill.

Avimin™ Custom Premix helps farmers maximize the performance of their livestock and optimize farm operations. All vitamins and minerals are directly sourced from global companies adhering to certified standards in quality.

What is a Breed-Specific Vitamin Premix?

Each breed of broiler, layer and swine has a specific nutrition requirements to achieve its optimum performance. Management and Nutrition Guides are published by breeding companies as guide for livestock raisers. As not all raisers have ready access to these published nutrition guides, most of them resort to using vitamin premix formulations in the market which do not provide the vitamin level recommendation for specific breeds. To help raisers maximize the performance of their livestock, Agrispecialist, Inc. has developed Breed-Specific Vitamin Premixes.

Using the latest nutrition guides from the most commonly used breeds of broiler, layer and swine in the Philippines, Agrispecialist, Inc. has formulated vitamin premixes that can address the vitamin requirement of specific breeds of swine, layer and broiler. These premixes when fed at specific stages of growth and reproduction of the animal, prevents vitamin deficiencies or toxicities. Breed Specific Vitamin Premix also assures cost-effectivity as safety margins are accurately set based on the specific breed requirements of each animal.

Avimin Breed Specific Vitamin Premix for PIC

AVIMIN PIC BPS		
VITAMIN	BREEDER	UNIT
Vitamin A	11,023,000	IU
